## Home Worker - Sewer Job Description

Thank you for taking the time to look at this roll within our business.

It really is the engine room of what we do and is a vital cog in the production process.

We are looking for people who would like a part time job with the flexibility of working from home to fit in with your own circumstances.

We do not require expert sewers as we will provide you with initial training and ongoing support to make sure you get the most out of this job.

The sewing you will do will be to create a rosette from pleated ribbon. This is a really simple process that takes the pleated ribbon strip that you will be provided with and sewing that onto a round guide thus creating the basic rosette shape.

You will need to be able to collect and drop off from us at least once a week. We provide an additional sum to help with your travel costs on top of your earnings. Amounts can be varied as we are very flexible.

Our rosettes are awarded at some of the most high-profile events in the UK and across the world. To succeed you will need to be determined, hardworking and conscientious. We are looking for people who wish to commit for 6 months or more as it will take you a month or two to get up to speed. This is a year round position

This roll is on a self-employed basis, working from your own home and paid via piece rates. Realistic earnings would be £12+ per hour and we offer a 10% bonus on your first 3 months working with us

If this sounds like something, you would be interested in please complete the online application form.

We look forward to hearing from you and maybe working with you soon?
